SKILLS

FRONTEND DEVELOPMENT | React.js • Redux • JavaScript • TypeScript
BACKEND DEVELOPMENT | Spring • Java • Express.js • Node.js
DATABASE | SQL • Postgre SQL
DEVOPS & CONTAINERIZATION | Kubernetes • Docker
VERSION CONTROL | Git • GitHub • GitLab
SOFT SKILLS | Team player • bias for action • deliver results

EXPERIENCE

KUDEKSKI SECURITY

Software Engineer | Dec 2021 - Present, Bangalore

Threat Navigator & Orbit Project – UI & Integration

- Worked on Threat Navigator and led UI & Integration efforts for the Orbit Project.
- Ensured timely delivery and facilitated seamless stakeholder approvals before rollout.

Web Scraper Bot Development – Data Automation

- Developed a web scraper in Node.js for Threat Navigator to automate data extraction.
- Kept the demo portal up to date by pulling data from integration and staging.
- Improved internal system updates and operational efficiency with automation.

Mentorship & Team Integration

- Effectively trained and mentored juniors, integrating them into the dev ecosystem.
- Fostered better collaboration within the team and improved overall productivity.

Full-Stack Contributions – Backend & Design Tools

- Contributed beyond frontend by working on Spring Boot (backend) and SQL.
- Improved UI/UX with Figma, securing a shared design license for collaboration.
- Led major UI/UX initiatives in India, previously handled only in Switzerland.

Sprint & Deployment Assistance – CI/CD & Kubernetes

- Assisted Product Leads in creating, organizing, and managing Sprint tickets.
- Guided teams on Kubernetes deployment testing for merge requests (MRs).
- Reduced bugs before merging code to master, ensuring a smoother CI/CD pipeline.

Internal UCM Migration – React & Performance Optimization

- Upgraded the Internal UCM project from old React to a modern tech stack.
- Turbocharged performance by integrating cutting-edge libraries and best practices:
 - Eliminated prop drilling by leveraging Redux for seamless state management.
 - Revamped navigation flow by transitioning from Reach Router to React Router.
 - Boosted build speed by replacing sluggish Webpack with ultra-fast Vite.
 - Enhanced API efficiency with TanStack Query for blazing-fast data fetching.

EDUCATION

PSNA College of Engineering & Technology (PSNA CET)

B.E - Computer Science Engineering
SEP 2020 | Dindigul.

CERTIFICATE

Meta Front-End Developer Specialization – Coursera | Mar 2024

COURSEWORK

Data Structures & Algorithms
UI/UX Design with Figma
Advanced React
HTML and CSS in depth
Version Control
Programming with JavaScript

AWARDS

Bravo Award – Nagravision Kudelski Group October 2024
Recognized for innovative solutions, backend contributions, and knowledge sharing.

Bravo Award – Nagravision Kudelski Group June 2022
Awarded for quick learning, timely project completion, and impactful UI & integration work.
